

# You talked... we listened!

For years farmers and irrigators have voiced their frustrations of repairing or tapping into existing pipelines.

**NO MORE EXCESSIVE DIGGING!**  
Only requires immediate area of the pipe to be exposed!

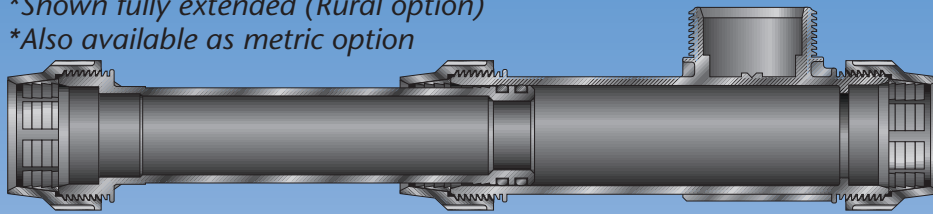

**NO MORE GUESSWORK!**  
Simply fit one end and slide into place... you'll never need 2 fittings again!

## TELESCOPIC JOINER/BRANCH TAKE-OFF

\*Appropriate inserts or collets are packaged with fitting.

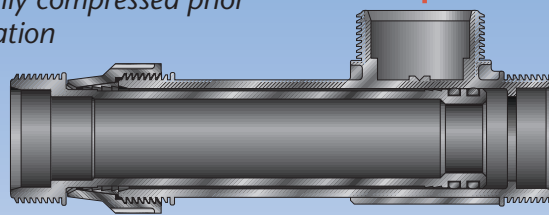

\*Shown fully extended (Rural option)  
\*Also available as metric option

Follow installation instructions to convert to a tee.

**No other fitting offers this level of versatility!**

Guyco GXT is Australia's first and only telescopic fitting range for poly pipe. For Rural B pipe the fittings feature Guyco Rural end assemblies, the fastest, simplest fitting for rural poly pipe... and Plassim end assemblies for metric poly pipe. The GXT Joiner/Branch Take-off features a take-off facility that can be tapped at any time. The GXT Tee can facilitate both male and female take-offs simply by using the appropriate Guyco adaptor kits. **All threaded ends/take-offs of the fitting body are totally interchangeable!**
